SUMMARY

Pre-final year Computer Science undergraduate (CGPA 8.6) with hands-on experience in core Java (OOP, exception handling, Collections Framework) and React-based frontend development. Built a role-based inventory management system in core Java and an e-commerce web application using React.js. Seeking a Java Full Stack or Frontend Developer internship.

TECHNICAL SKILLS

Programming Languages: Java, C, JavaScript (ES6+)

Core Java: Object-Oriented Programming (OOP), Interfaces, Inheritance, Generics, Method Overloading, Method Overriding, Exception Handling, Collections Framework (ArrayList, HashMap)

Frontend Development: HTML5, CSS3, React.js (Components, State), Responsive Web Design

CS Fundamentals: Data Structures & Algorithms, DBMS, Operating Systems

Tools & Platforms: Git, GitHub, VS Code, Vite, npm, Netlify

EXPERIENCE

Web Development & Designing Intern — Oasis Infobyte

Remote | Jun 2026 – Jul 2026

- Built responsive web applications using HTML5, CSS3, JavaScript, and React.js during a hands-on web development internship
- Translated design requirements into functional, cross-device compatible interfaces, strengthening frontend development skills
- Applied version control practices (Git/GitHub) throughout the development workflow

PROJECTS

Inventory Management System | stockline-inventory-system.netlify.app

Java, HTML, CSS, JavaScript

- Designed a role-based inventory management system in core Java applying OOP principles — custom Database, Role, and Generic interfaces, inheritance, and generics — with AdminRole for employee management and EmployeeRole for product handling, purchases, payments, and 14-day returns
- Implemented method overloading and overriding across role-specific classes, applied exception handling (try-catch) for input validation, and used the Collections Framework (ArrayList, HashMap) with file-based persistence to manage transaction data
- Built a responsive multi-page frontend, including dashboard, products, employees, transactions, and login pages, using HTML, CSS, and modern JavaScript modules

Cheffy – The Kitchen Store | cheffy-kitchenstore.netlify.app

React, JavaScript, Local Storage

- Built a responsive e-commerce web application using React.js, with reusable components (ProductCard, Navbar) rendering a dynamic product catalog
- Implemented a shopping cart with add/remove functionality and running totals, plus category-based search and filtering
- Built a client-side authentication flow with Local Storage session management for user login and protected routes; deployed on Netlify

Manufacturing Machine Defect Tracking System | smart-factory-xi.vercel.app

Team Project

- Selected a problem statement and directed AI-assisted ("vibe coding") development of a full Python/Django application at a 24-hour hackathon hosted by the college, defining requirements and reviewing AI-generated output for defect detection based on temperature and humidity sensor data
- Recognized as "Best Performer" on the team at the hackathon, an award given to a limited number of participants

CERTIFICATIONS

- Java (Basic) — HackerRank | Google AI Essentials — Google | Introduction to Programming in C — NPTEL
- Responsive Web Design — freeCodeCamp | JavaScript Algorithms & Data Structures — freeCodeCamp

ACHIEVEMENTS

- Earned a 100 Days Badge on LeetCode with a currently active 70-day coding streak, solving problems across core Data Structures & Algorithms topics
- Awarded "Best Performer" on team at the college's 24-Hour Hackathon on Vibe Coding

EDUCATION

B.Tech, Computer Science and Engineering — Narsaraopeta Engineering College

May 2028

Narasaraopeta, Andhra Pradesh | CGPA: 8.6

Intermediate (MPC) — Sri Chaitanya Jr College

May 2024

Guntur, Andhra Pradesh | 97.6%

SSC — Pragati Talent High School

May 2022

Sattenapalli, Andhra Pradesh | 93.7%
